

# Cardiopulmonary Resuscitation and Automated External Defibrillation Refresher

We come to your premises anywhere in the UK and train your staff how to use your defibrillator safely, promptly and effectively.

Our AED and CPR Refresher course covers the same material as the 4 hour AED and CPR course, but as it is a recap we have shortened the course in length. The course is just 2 hours including the assessment, meaning it will fit in easily with most schedules.

## Our students will learn about:

- Heart conditions and sudden cardiac arrest
- Basic Life Support (including CPR training)
- Resuscitation Council (UK) guidelines (and any updates they have made)
- AEDs - what they do, how they do it, and how to use them

*All dates booked over 30 days in advance can be confirmed immediately and will be a guaranteed booking*

This course is registered with TQUK (Ofqual approved).

\*This is not generic training, all our learners learn how to use the defibrillator that their companies have purchased.

\*Learners must have a valid AED/CPR certificate at the time of taking this course and be able to present it.

## Price includes:

- Professional Instruction
- All course materials
- Glossy A5 AED user manual
- AED user certificate, valid for 12 months
